### [Fusion Splicer UJS-S200 Firmware Version Update to 1.20](#)

The UJ Consortium are pleased to announce that firmware version 1.20 for the Fusion Splicer UJS-S200 is now being released. The results of estimated splicing loss using the diameter alignment method, may differ from the actual splicing loss due to Mode Field Diameter (MDF) differences in version 1.10.

Firmware version 1.20 improves accuracy of the estimated splicing loss using the fiber diameter alignment method. This is not urgent update, but UJ Consortium recommendation.

The Firmware can be updated by users, free of charge, by access to a dedicated Sumitomo Electric server via the Internet.

**Note:** Fusion Splicers UJS-S200 with following serial numbers already have Firmware version 1.20 installed.

*Serial No: 1096 (S22-0009), 1097 (S22-0010), 1098 (S22-0011), 1099 (S22-0012), 1100 (S22-0013)*

To update the firmware, it is necessary to install a designated application to the local PC prior to accessing the Sumitomo Electric site for downloading the firmware.

For the installation of the download application to the PC and updating the Fusion Splicer firmware, please contact [uj.sales@k-kcs.co.jp](mailto:uj.sales@k-kcs.co.jp) for full information.

If you have any queries concerning these information, please contact the UJ Consortium Co-ordinator.
