C-SAMS Controller - Manufacture/Support Discontinuation Notice

The UJ Consortium hereby gives notice to end support for the first generation of the C-SAMS Molding Controller, which has been available since 2001. The first generation of the controller can be easily identified as it has a 9-pin RS232 serial port on the upper facing console as shown in the image below.

Due to the manufacture obsolescence of several critical parts, repairs of these controllers may be undertaken only if certain parts are available. Once stocks of these parts are exhausted, the options would be to upgrade the unit to a newer build standard or to replace the complete unit with one to the latest build standard.

If you have any queries concerning these changes, please contact the UJ Consortium Coordinator.
