Customer Service Improves.

Lead-Times Down Again.

Global Marine Systems Limited is proud to announce the second reduction to its delivery lead-times in nine months.

Further to our reduction from eighteen weeks to fourteen weeks, all Universal Joint and Universal Quick Joint consumable kits will be available at the greatly reduced lead-time of just **FIVE** weeks.

This latest improvement is to be effective from 1st June 2000. It represents a significant milestone in the continuous effort to drive down lead times and improve customer service.

The advancement results from a successful co-ordinated approach between Cable services, Global Marine as a whole and its suppliers, developing joint strategies.

We are committed to continuing the current trend of lead-time reductions, in line with our policy of continuous improvement. We intend to tackle the remainder of Global Marine supplied items in the future.

CSPB006-01

Note: Global Marine wishes to retain the right to adjust lead times for substantially large orders.
