## New Pirelli 18.5mm Tool Kit.

**G**lobal Marine continues to be present at the forefront of developments and improvements to Universal Jointing technology. As part of this continuous development and improvement, it is occasionally necessary to carry out a review of supporting tools and equipment kits.

Due to recent additional qualifications carried out by Cable Services, the current Pirelli 18.5mm has now become obsolescent. As a result, KIT056AA is to be replaced by KIT067AA.

The upgrade will allow existing users of KIT056AA to transfer all tools to a new kit box.

KIT067AA contains all the tools and equipment from the old kit (KIT056AA) **and** tools for the newly qualified Pirelli 18.5mm HRA-E cable variant. In addition, it has been further consolidated to include press adaptors, mould inserts and collets.

For owners of the now obsolescent KIT056AA, Global Marine is offering an upgrade alternative to buying a complete new tool kit.

The new box comes complete with the additional tools required for the Pirelli 18.5mm HRA-E cable operations and spaces for all the existing tools of KIT056AA.

The upgrade kit is given a unique number being KIT066AA and is available at a significant cost saving over KIT067AA for those existing users of UJ for Pirelli 18.5mm cable.

## Summary:

1. KIT056AA is to become obsolescent and will no longer be offered for sale
2. KIT067AA is the new Pirelli 18.5mm tool kit including HRA-E capability
3. KIT066AA is the low-cost alternative to upgrade from KIT056AA to KIT067AA
