Kit Changes

To improve the structure and management of jointing kits, the contents of Global Marine supplied LW/LWP End Specific Kits, LW Protection Kits and Armour Transition Kits have been revised. The revision involves the transfer of buffer fillers from LW/LWP end specific kits to LW Protection Kits and Armour Transition Kits.

- New LW/LWP End Specific kits **not containing** buffer fillers are available immediately.
- Old LW/LWP End Specific kits **containing** buffer fillers will still be available during a transitional period (approximately 2 years).
- The new LW Protection Kit (KIT10013) and Armour Transition Kit (KIT10032) **containing** buffer fillers are available immediately.
- The old LW Protection Kit (KIT10011) and Armour Transition Kit (KIT10030) **not containing** buffer fillers will still be available for a transitional period (approximately 2 years).

Old Kit No: New Kit No:

10011	10013
10030	10032
11110	11111
11211	11212
11310	11311
11410	11414
11411	11415
11413	11416
11420	11422
11421	11423
11430	11431
11530	11531
13111	13112
13216	13218
13312	13314
13410	13411
13420	13424

Old Kit No: New Kit No:

13421	13425
13423	13426
13700	13701
13710	13711

If there is a requirement to use old LW Protection Kits and Armour Transition Kits with new end specific kits, a new Buffer Filler Spares Kit (KIT19010) has been introduced, that contains six spare buffer fillers of each size (12 off total). It is recommended that one KIT19010 be carried on each installation and/or maintenance vessel.
