

# Cable Services Product Bulletin Number: 016

Global Marine Systems Limited;  
A Member of the Universal Jointing Consortium  
**24th September 2002**

[www.ujuc.com](http://www.ujuc.com)

## **OS KIT RATIONALISATION**

Global Marine has simplified and rationalised the end specific kits available for OS cables. Previous kits were specific to particular kingwire and package sizes but the new kits will be suitable for all sizes of package and kingwire.

With the exception of OS HT, OS LAP and OS SS, all kits are hydrogen managed.

Superseded kits may still be ordered but they will not be advertised and the delivery times may be longer. The following table provides a summary of the kits available, but full details may be found on [www.ujuc.com](http://www.ujuc.com).

## **Hydrogen Managed End Specific Kits:**

### **Loose Tube**

Kit13700 OS Tube H2 LW  
Kit13710 OS Tube H2 LWS  
Kit13720 OS Tube H2 SAL  
Kit13730 OS Tube H2 SAM  
Kit13750 OS Tube H2 DA  
Kit13760 OS Tube H2 RA

### **Fibre Package**

Kit13800 OS LW H2  
Kit13810 OS LWS H2  
Kit13820 OS SAL H2  
Kit13830 OS SAM H2  
Kit13840 OS SAH H2  
Kit13850 OS DA H2  
Kit13860 OS RA H2  
Kit13860 OS DA H2 Mechanical Fuse

Note: H2 kits can only be used with Kit09002

## **Non-Hydrogen Managed Kits:**

Kit11432 OS HT  
Kit13510 OS LAP SAM  
Kit13520 OS LAP SAH  
Kit13610 OS SS LW  
Kit13620 OS SS SAL  
Kit13630 OS SS SAM

## **OS LWS SCREEN SEALING**

### **SUPPLEMENT KIT**

A procedure has been produced to enhance the screen sealing technique, which necessitates the use of three extra consumables. These additions will be in OS Screen kits purchased after September 2002, but are also available separately in Kit223AA, which may be purchased from Global Marine Sales. As the procedure applies retrospectively, it is strongly recommended that all OS LWS kit-holders purchase this kit to conform to the new procedure.
