Termination of Customer Services for K9 Fusion Splicer UJS-S100R

This UJC Bulletin is to notify the termination of maintenance, calibration and repair services for K9 Fusion Splicer at the **end of March 2025**.

The following Fusion Splicers are affected by this notification:

K9 UJS-S100R Fusion Splicer, Serial Nos. 2001 to 2104

These were supplied between April 2007 and March 2018.

IMPORTANT NOTICE

Please note, it may not be possible to carry out some repairs during the above notice period once critical components become unavailable.

Some components such as the microscope and the heater for encapsulation are already in limited stock, therefore to minimize the risk of damage to these components, users are recommended to observe the following precautions.

Do not use excessive Isopropyl Alcohol to clean the microscope – use only a lightly moistened cotton swab. A circuit board is situated beneath the microscope and it can be damaged if contaminated by solvent.

Do not use compressed air dust removers to clean the Fusion Splicer because the air blast can damage the microscope.

Please do clean the microscope occasionally, but with great care.

Do not change the Encapsulation Heater program from the factory installed program.

Please do take great care to avoid damage to the Encapsulation Heater surface

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
