DISCONTINUATION OF SUBCOM SL21 & SL17 SPA ANODE SCREEN TERMINATION

Introduction: This bulletin provides notice of the discontinuation of the SubCom SL21 and SL17 SPA Anode Screen Termination processes and the supply of associated parts as described in UJCM017. For information please refer to Figure 1.

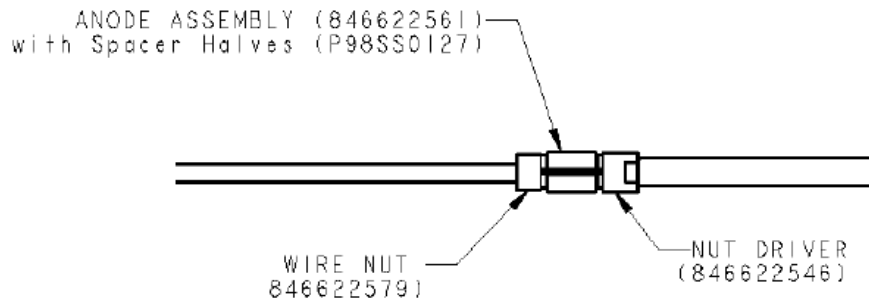

Figure 1 – Anode Screen Termination (with Spacer Halves)

Continued Use: Existing SL21 and SL17 SPA kits may be used after this date and UJCM017 will continue to be provided in the regular UJCM releases, however users should note that the document may not be updated unless a critical change is required.

Last Order Date: The last date of order for these parts will be end of October 2019.

Replacement of Stock: Owners replenishing their inventory should purchase the necessary SL21 or SL17 Lightweight End Specific Kit to suit their cable type and the add-on Heatshrink Screen Termination Kit - KIT246AA. The assembly procedure for KIT246AA is provided in UJCM017/1.

Training: System owners having inventories of the Anode Screen Termination should check with their maintenance provider that their personnel are receiving the necessary training for the Anode Screen Termination, and as necessary the additional training for the latest Heatshrink Screen Termination assembly - KIT246AA. The UJC will continue to provide training in the technique outlined in UJCM017 for the foreseeable future. A one-year notice will be issued prior to the cessation of this training.

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
