Termination of Customer Services for K9 Fusion Splicer UJS-S100R Reminder

This UJC Bulletin is to remind customers of the termination of maintenance, calibration and repair services for the K9 Fusion Splicer. This has previously been notified by UJCB080 on 1st June, 2018.

The repair stocks of performance parts, such as the microscope, are now exhausted. Apart from the replacement of consumable parts such as electrodes, the repair/replacement service for the performance parts is now terminated.

Please also be reminded that the calibration and maintenance services for the K9 Fusion Splicer UJS-S100R will be terminated at the end of March 2025.

The Fusion Splicers affected by this notification are as follows:

K9 UJS-S100R Fusion Splicer, Serial Nos. 2001 to 2104

These were supplied between April 2007 and March 2018.

IMPORTANT NOTICE

The customers are kindly recommended to observe the following precautions to minimize the risk of damage to precision parts.

Do not use excessive Isopropyl Alcohol to clean the microscope – use only a lightly moistened cotton swab. A circuit board is situated beneath the microscope and it can be damaged if contaminated by solvent.

Do not use compressed air dust removers to clean the Fusion Splicer because the air blast can damage the microscope.

Please do clean the microscope occasionally, but with great care.

Do not change the Encapsulation Heater program from the factory installed program.

Please do take great care to avoid damage to the Encapsulation Heater surface

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
