### ***RENAMING OF UJ END SPECIFIC KITS FOR SL17 AND SL21 LOOSE TUBE CABLES***

The UJC announce with immediate effect the naming convention of the UJ End Specific Kits for the SubCom SL17 and SL21 loose tube cables will no longer reference the number of fibers or fiber pairs and will list the quantity of Fiber Ferrule Restraints contained in the kit.

For example, KIT28101 SL17L LW End Specific Kit - Dual Ferrule Restraint (up to 48 fibers) has been updated to KIT28101 SL17L LW End Specific Kit - Dual Ferrule Restraint.

SL17 or SL21 Loose Tube Cables containing up to 24 fibers or 12 fiber pairs may use a UJ kit containing a Single Ferrule Restraint or a UJ kit containing a Dual Ferrule Restraint.

SL17 or SL21 Loose Tube Cables containing 26 fibers or 13 fiber pairs or more will require a UJ kit containing a Dual Ferrule Restraint.

If you have any queries concerning these changes, please contact the UJ Consortium Coordinator.
