Introduction of Cable Insulation Removal Tool Support Handle (KIT299AA) for UJ/UC/UQJ Motorized Cable Stripper Kit (KIT160AA)

The UJ Consortium is pleased to announce the introduction of an additional handle for the Motorized Cable Stripper, which provides the jointer with an improved purchase on the tool, reducing strain and risk of injury.

The UJ/UC/UQJ Cable Stripper Kit (KIT160AA) enables the removal of long lengths of polyethylene insulation, in a much shorter time than by manual removal methods, whilst protecting the cable conductor from accidental damage. The Motorized Cable Stripper is driven by a powerful battery drill which generates greater torque as the gauge of the cable increases and so the support handle (KIT299AA) should be used to properly control the tool and to reduce the risk of strain injury.

The Cable Insulation Removal Tool Support Handle (KIT299AA) may be ordered from your UJ Consortium supplier.

If you have any queries concerning this information, please contact the UJ Consortium Co-ordinator.
