

Universal Jointing Consortium

Bulletin Number: UJCB005

18th January 2001

www.ujconsortium.com

The picture below shows an example from the set of 5 moulding acetates.

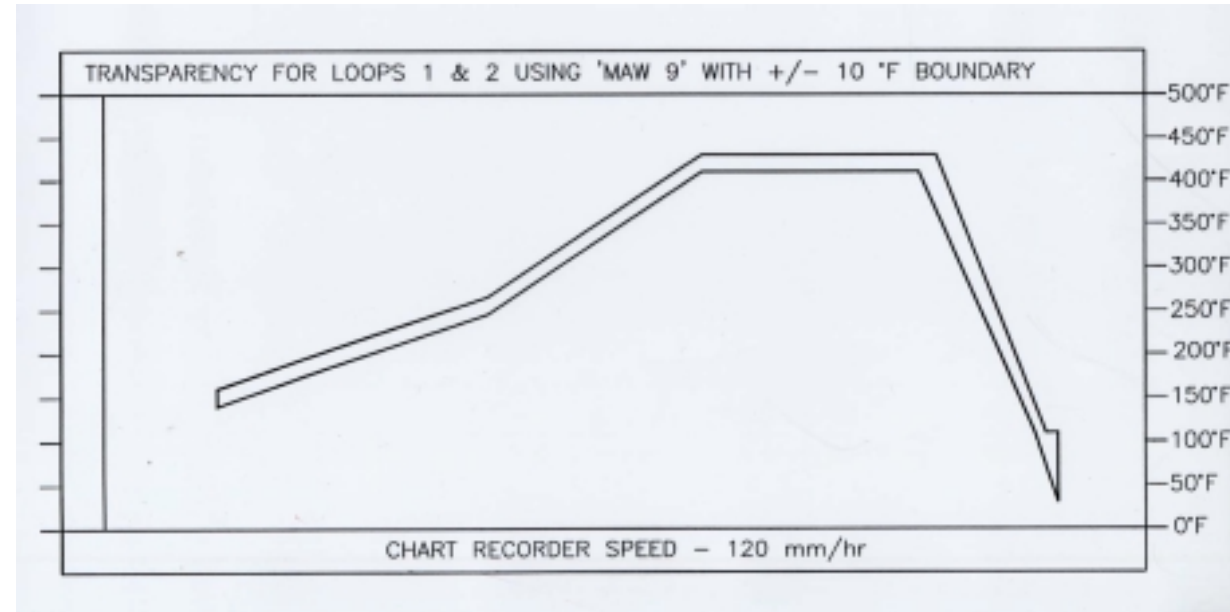

UJ Moulding Acetates

Since the introduction of the CD-ROM version of the Universal Jointing Construction Manuals, the general circulation of these documents in paper form has been discontinued.

UJCM034 refers to Acetate Sheets to check that the SAMS Moulding traces are within pre-determined limits. These Acetate Sheets were issued in 1998 on a one-off basis when the UJ Manual was in paper form.

Global Marine Systems Limited have a supply of Acetates and are happy to supply these free of charge to UJCM Explorer recipients on request.

A request form may be found in the construction manuals section of the website:
www.ujconsortium.com or

please e-mail: keith.spicer@globalmarinesystems.com including your delivery address.
