### KCS OS-H2, OS-TUBE & OCC SC-100 Hydrogen Managed End Specific Kits

The UJC would like to announce a change to KCS OS-H2, OS-TUBE & OCC SC-100 Hydrogen Managed End Specific Kits. In concordance with the worldwide phase out of lead from the electronics industry, the UJC has re-qualified the hydrogen management process for OS-H2, OS-TUBE & OCC SC-100 cables from solder to adhesive. The table below provides details of the new end specific kit numbers. Customers will still be able to use their existing 'Solder' end specific kits but an upgrade kit (KIT247AA) will be available to upgrade OS-H2, OS-TUBE & OCC SC-100 end specific kits to the adhesive technique. The new End Specific Kits, Training Kits, Ferrule Kits & Upgrade Kit will be available from 1st January 2008 and the new process will be published in the December 2007 Explorer. The existing Adhesive Kits, KIT15070 & KIT15110, can still be used with the new process, but the flux & solder will be removed.

As this technique is very similar to other hydrogen managed techniques using adhesive, such as Pirelli 18.5mm & OCC-SC-300, no additional training will be required for jointers already trained in these cables.

The only extra tooling is a Mandrel (OS005D01) which can be purchased as an individual item.

<u>Cable Type</u>	<u>Existing Kit</u>	<u>Replacement (Adhesive) Kit</u>
OS H2 LW	KIT13800	KIT13801
OS H2 LWS	KIT13813	KIT13814
OS H2 SAL	KIT13820	KIT13821
