### **MOULD BLOCK ALIGNMENT KIT**

The UJC would like to endorse the use of the Mould Block Alignment Kit to customers as a maintenance aid to improve the quality of the moulded joint. The UJ Joint Housing Mould comprises several sections that are clamped together. After a number of mouldings and routine cleaning and maintenance [see Operation & Maintenance Manual (OMM) 011], the individual sections can become misaligned, which could cause variations in the wall thickness of the moulded joint and provide traps for retaining polyethylene allowing 'hardbake' to form. The Mould Block Alignment Kit allows the mould to be realigned by the user (OMM046) as part of the planned maintenance scheme. The Mould Block Alignment Kit (KIT094GM) may be purchased from any of the Universal Joint Consortium members listed below

For further information please contact the UJC.
