KCS OS-H2 & OCC SC-100 Hydrogen Managed End Specific Kits

The UJC have re-issued UJCM037 as Issue 2 to correct a kit reference (OCC SC-100DA KIT24021 --> KIT24041).

Since KCS OS & OCC SC-100 cables were confirmed as being identical, KCS OS-H2 and OCC SC-100 hydrogen managed (PEEK Seal Technique) end specific kits have been rationalised and are now called KCS OS-H2 and OCC SC-100 (PEEK Seal Technique) End Specific Kits. The table below gives details of the changes.

UJCM064 has been discontinued and the cable end preparation technique is now detailed in UJCM 026/3, which is for KCS OS-H2, OS-TUBE & OCC SC-100 cables.

Adhesive Kits: Kits 15070 and 15110 were discontinued and the new adhesive kit for KCS OS-H2 (H2 Adhesive) and OCC SC-100 (H2 Adhesive) is KIT15071.

H2 Soldering Technique: KIT15072 has been introduced for those customers that still have hydrogen managed kits using the soldering technique. This kit will be available until April 1st 2009 to allow time for customers to upgrade their end specific kits for the adhesive method.

The changes were effective from 1st April 2008.
