KCS OS-H2 & OCC SC-100 Fibre Extraction Enhancement

The UJC would like to announce an enhancement to the fibre extraction procedure for KCS OS-H2 and OCC SC-100 cables. Part of the procedure entails immersing the package in a solvent for a specific time. The tooling for this new procedure is minimal and can be obtained readily from proprietary part suppliers but UJC members can supply a toolkit for this purpose (KIT249AA).

The tooling will be listed in UJCM 026/3.

For further information please contact the UJC.
