New UQJ Armoured Protection Kit - Kit30021

The UJC would like to announce that the UQJ Armour Kit, **KIT30020** and the UQJ armour/armourless transition kit **KIT30030** will be superseded by **KIT30021** & **KIT30031** respectively.

The reason for the change is to introduce a **new UQJ Armour Wedge (AK233D01)** in place of the **existing wedge (AK208D01)**.

The trend for UQJ cables is for higher tensile armour wires and the new wedge has hardened wedge inserts to match these armour wire grades. Both the existing and replacement kits can be used on the current range of UQJ qualified cables.

Where future cable qualifications require use of the newer **KIT20021** these shall be specified in the relevant UQJCMs and listed at www.ujconsortium.com.

The new Armour Protection Kit will be available from May 1st 2008.

For further information please contact the UJC.
