### **CLEANING METHOD OF THE MICROSCOPE LENSES FOR UJS-S100/S100R**

The UJC would like to raise a caution about cleaning method of microscope lenses for the Fusion Splicer UJS-S100/S100R.

A cleaning method of the microscope lenses in the operation manual has instructed that the lenses should be cleaned up with cotton swab moistened with a small amount of alcohol.

Since alcohol might flow to the circuit board which is equipped underneath the lenses and it might induce a malfunction, use of a cotton swab with excessive amount of alcohol must be avoided.

This caution will be added from the new Operation Manual that will be newly shipped Fusion Splicer, and for the already supplied Fusion Splicer UJS-S100/UJS-S100R, the seal for a caution will be attached to the Operation Manual if it will be delivered at maintenance of Fusion Splicer.

If you have any question on this matter, please do not hesitate to contact your supplier or alternatively you may contact Kokusai Cable Ship direct ([uj.sales@k-kcs.co.jp](mailto:uj.sales@k-kcs.co.jp)).
