NEW ADHESIVE & SHELF LIFE KIT LABELLING & DOCUMENTATION

The UJ Consortium would like to notify their customers of some improvements to the labelling & documentation for adhesive kits and kits containing items with expiration dates (shelf lives). This will improve the importation/exportation process and remove any uncertainty about expiry dates for customers and users.

Labelling:

- Each individual adhesive or shelf life item will have a label detailing Part Number, Lot Number, Date of Manufacture, Shelf Life, Expiry Date and Extended Expiry Date (if appropriate).
- Each adhesive kit case will have an external label detailing Kit Title, Kit Number, Contents, Quantities, Transportation Data, Expiry Dates and Extended Expiry Dates (if appropriate).

Documentation:

- Each adhesive kit will contain a bespoke Customer Information Sheet detailing Kit Title, Kit Number, Contents, Quantities, Storage Conditions, Shelf Lives, Dates of Manufacture & Expiry, Extended Expiry Dates (if appropriate) and whether Material Safety Data Sheets are required.
- Each adhesive kit will contain the pertinent Material Safety Data Sheets.
- A Document Holder containing the Customer Information Sheet and Material Safety Data Sheets will be affixed to the external surface of the adhesive kit.

Case: Where appropriate, the adhesive kit case may be made of a transparent material to allow for quick inspection of the contents.

The new procedures will apply to the following kits:
