UQJ KIT30000/30001 SUPPLEMENT KIT

The UJ Consortium would like to notify their customers of a new UQJ Supplement Kit, KIT260AA.

KIT30000 was superseded by KIT30001 which was in turn superseded by KIT30002 to upgrade the UQJ technology for newer cables with loose tube construction and higher fibre counts. This has necessitated the use of more Splice Encapsulations, Fibre Separators and the use of Clip Inserts and Melinex Retaining Loops not all of which were available in KIT30000 and earlier issues of KIT30001.

As Clip Inserts and sufficient Fibre Separators are now included in KIT30002, they will be removed from all end specific kits for the following cable types from January 1st 2013: ASN URC-2, ASN/Nexans URC-1, NSW CT and will not be included in new end specific kits for Ericsson GJM(M)LTV, CCSI RI-SUB, Prysmian Sub24FO and ZTT SOFC.

To allow customers to use their newer end specific kits for the above cable types with older KIT30000/30001 Common Kits, the UJC have produced a UQJ KIT30000/30001 Supplement Kit which will contain:

- 2 Off Clip Inserts (Z1166A)
- 15 Off Fibre Separators (AK090D01)
- 5 Off Melinex Retaining Loops (BB082S01)
- 1 Off Splice Consumables Kit (SPL002AA)

The above changes will take from January 1st 2013.

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
