ASN OALC-2 & S280 ADHESIVE KIT – KIT15020

KIT15020 containing 3 x tubes of silicon sealant is presently specified for ASN OALC-2 and ASN S280 cables.

For OALC-2, the sealant is only used for those end specific kits containing copper seals (RES30845/8) which were supplied prior to February 1998. In February 1998, the copper seals were replaced with PEEK Seals (AU008D01) where no sealant is required. The PEEK Seal is also supplied in an optional upgrade kit, KIT251AA.

The UJ Consortium would like to advise customers that KIT15020 will no longer be specified for ASN OALC-2 cables although it will still be available for customers who have kits containing Copper Seals (RES30845/8) and have not upgraded to PEEK Seals. The following table shows the serial numbers of kits when PEEK Seals (AU008D01) were included.

OALC-2 Kit Number	S/N when PEEK Seals were included
KIT11311	0001
KIT12310	0703
KIT12320	0570
KIT12330	0395
KIT12331	0146
KIT12350	0001
KIT13311	0712
KIT13312	0024
KIT13314	0001

KIT15020 will continue to be specified for ASN S280 cables.

The above will be effective from 1st June 2014.

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
