UQJ ARMOR KIT ENHANCEMENT

The UJ Consortium is pleased to announce the following kit enhancement:

Many of the current cables being qualified for UQJ have harder armor wires necessitating an enhanced grip by the armor clamp. To assist in this process, the standard UQJ Armor Wedge supplied in the UQJ armor protection kits (KIT30021) has been amended to be serrated/fully threaded for its entire length. The new wedge (GMS446D) replaces Wedge (AK233D01) which required Wedge Inserts to be fitted. This change will be introduced in January 2016 and is backwardly compatible with all UQJ qualified armor cables.

The common armor kits affected are:

KIT30021 will be superseded by **KIT30022 UQJ ARMORED PROTECTION KIT**

KIT30031 will be superseded by **KIT30032 UQJ ARMORLESS/ARMORED TRANSITION KIT**

Some newer UQJ qualified cables already include the new wedge in their end specific kits which will be removed from January 2017 as the new KIT30022 becomes more widely available.

The armored cables that **MUST** use the newer GMS446D wedges are:

Ericsson	GJMLTV
Hengtong	HOUC-1
Prysmian	ST-48
ZTT	SOFC Q10

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
