UJ END SPECIFIC KIT ENHANCEMENTS

The UJ Consortium is pleased to announce the following component enhancement: The Split Bend Limiter (BA035D01) has been re-modelled as a single unit. The stock number for the new single-part split bend limiter, which is easier and quicker to fit, remains as BA035D01 but with a later issue.

Notes:

- The new single-part Split Bend Limiter will start to be provided by some UJ Suppliers from November 2015 for the full range of loose tube end specific kits.
- There is no need to upgrade existing kits because the 2-part Split Bend Limiter can continue to be used.
- Instructions for using both the single and the 2-part Split Bend Limiter will be provided in the relevant UJCM Sections.
- Some UJ Suppliers may continue to provide the 2-part Split Bend Limiter.

If you have any queries concerning these changes, please contact the UJ Consortium Co-ordinator.
